Evaluating the Potential and Educational Effectiveness of Emerging Technologies to Enhance Student Learning

April 10, 2018

Goals

1. **Lower the overall cost** of earning a degree delivered through distance learning technologies
2. **Design courses within a program** that eliminate the student cost for instructional materials
3. **Empower faculty** to investigate, source, select, integrate into their courses, and evaluate Open Education Resources (OER) options as alternatives to textbooks

Results

- Faculty collaboration with library staff to find, review, select, and adopt open education materials
- Successful incorporation of free instructional materials into 12 MBA Online program courses so far
- Working to address barriers and establish a scalable process for other programs
